CHAPTER ONE – Lovemaking or Sex?

CHAPTER TWO – Teasing

CHAPTER THREE – Licking

CHAPTER FOUR – Tongue Circling

CHAPTER FIVE – Lip Circling

CHAPTER SIX – Windshield Wiper

CHAPTER SEVEN – Figure Eight

CHAPTER EIGHT – Belly Dancer

CHAPTER NINE – Deep Throat

CHAPTER ONE

Lovemaking or Sex?

If there is one thing we want you to understand more than anything else, it is the simple fact that there is a big difference between having sex and making love.

Understanding the difference between having sex and making love is what will transform your oral sex experience from run of the mill sex to moaning, toe curling lovemaking.

Here is the difference:

Sex is about "me."

Lovemaking is about "us."

Sex is often about doing what you need to do to reach an orgasm for yourself.

Lovemaking is about experiencing increased pleasure yourself because you have focused on heightening the pleasure of your partner.

It is our desire that The Best Of Oral Sex Tips And Tricks will help you make that wonderful transition from just having run of the mill sex to enjoying some amazing lovemaking.

CHAPTER TWO

Teasing

We always recommend starting your fellatio experience with some intimate and erotic teasing to stimulate your partner's senses, lengthen the time he is experiencing pleasure and heighten his arousal.

This chapter contains two very erotic teasing techniques that may increase your partner's pleasure and improve your lovemaking experience.

Ear to Fingertips Tease

The area just behind the ear is an erotic zone for many people.

Begin by sensually kissing your partner and then softly licking and kissing your way around to his ear.

Kiss, lick and gently nibble his ear lobe for a few seconds and then work your way behind his ear.

Place your lips next to his skin and breath out to let your warm breath caress the sensitive area behind his ear. Lick, kiss and nibble the area behind his ear.

Slowly begin to kiss and lick your way from behind his ear and then down his neck. The key is to do it slowly and sensually.

Next, kiss and lick your way down his neck and then down his arm slowly. Make sure you linger at the bend on the inside of his elbow - this is another sensitive zone.

Continue kissing, licking and nibbling down his arm and then begin kissing, licking and nibbling his hand. Use the warm breath technique and blow softly and warmly on his palm occasionally.

Hold his hand in front of your face with his palm toward you. Use your tongue to lick his little finger like a lollipop starting at the palm and licking slowly and sensually all the way to the tip.

Lick and moisten your lips and then take his little finger all the way into your mouth. Close your lips around his finger gently. Press your moist tongue tightly against his finger and undulate your tongue, massaging his finger. (This is also a great technique to use on his penis later).

Very slowly pull his finger almost all the way out of your mouth leaving just the tip inside and then slowly push his finger back in and undulate your tongue against him again. Repeat as many times as you want to on that finger and then begin all over with the next finger.

Once you have done all four fingers and his thumb, he should be longing to feel your mouth performing that amazing technique on his penis.

Thighs, Balls and Pubic Tease

Fellatio can be so much more than just taking your partner's penis into your mouth. Even in the groin area, there are techniques to heighten and stimulate him before ever touching his penis.

The area below the stomach and to the base of the penis is an erotic zone for many men. Many men can also be sensually stimulated by orally massaging their balls and inner thighs.

Begin by sensually kissing your partner on the lips and then softly and slowly licking and kissing your way down his chin, neck, chest and stomach.

When you reach the pubic hair area just above his penis, kiss, lick and gently nibble the whole area from the bottom of his stomach to the base of his penis, from the top of his right hip to the top of his left hip.

Place your lips next to his skin and breath out to let your warm breath caress his skin. Lick, kiss and nibble the area slowly and sensually.

You may need to grasp his penis in your hand to move it out of your way as you kiss, lick and nibble around it.

If you want to increase the tease, do not massage his penis with your hand yet. If you want to bring him more quickly to a climax, use your thumb to gently massage the underside of his penis and you kiss, lick and nibble around his pubic area.

Hold his penis upright and then slowly begin to kiss and lick your way from the base of his penis down his balls. Use your other hand to cup his balls and reposition them gently as you lick and kiss the front, the sides and even underneath his balls. Place your lips next to his skin and breath out to let your warm breath caress his skin under his balls. As always, the key is to do it slowly and sensually.

Next, gently shift his balls aside and hold them there while you kiss and lick the inside of his thighs where his balls would normally touch. Kiss and lick one inner thigh slowly and sensually, then lick your way across his balls and then kiss and lick his other inner thigh slowly and sensually.

Once you have kissed and licked his inner thighs, balls and pubic area, he should be longing to feel your mouth performing that amazing technique on his penis.

CHAPTER THREE

Licking

Good fellatio is more than just taking a penis into your mouth and bobbing your head up and down. Licking techniques can stimulate the penis without ever taking it into your mouth.

Quick Flick Licking

There is a very sensitive area on the underside of the penis just below the head of the penis. If your man is uncircumcised, you will have to gently pull down his foreskin to get to that area.

Stick your tongue out and wiggle the tip of your tongue. You should be able to wiggle the tip of your tongue up and down and even side to side with practice.

Take your partner's penis into your hand and hold it up in front of your face. Move your face forward and stick out your tongue until just the tip of your tongue barely touches that sensitive area just below his penis head and on the underside of his penis.

With just the tip of your tongue just barely touching that sensitive area of his penis, start to wiggle the tip of your tongue. Wiggle the tip of your tongue up and down. Wiggle the tip of your tongue side to side. Make sure you are just barely touching his skin. It should feel to him as if a butterfly is fluttering against his penis.

Use those quick flick licks on the underside of his penis and then move to the right side just under his penis head. Quick flick lick there for a while and then move back to the underside and then move to the left side of his penis just below his penis head and quick flick lick there.

The keys to the Quick Flick Lick technique are to make sure the tip of your tongue is just barely touching that sensitive area of his penis and to make quick flicking motions with the tip of your tongue.

Ice Cream Cone Licking

With the Quick Flick Lick technique, we just wanted the tip of the tongue against the penis for short quick flicks. For the Ice Cream Cone Licking technique, we will press the whole tongue against his penis for long, wet strokes.

Take the base of your partner's penis into your hand and hold it up in front of your face. Move your face forward and stick out your tongue.

Beginning at the base of his penis, press as much of your tongue as you can against the underside of his penis. Slowly raise your head, keeping your tongue against the penis, stroking in one motion from the base to the very top of the head.

Pull your tongue away. Rewet your tongue inside your mouth. Place your tongue at the base of his penis again and begin that slow lick all the way to the top of his penis head again.

Repeat again and again.

To add some variety, use the same long, slow licks from bottom to top on each side of his penis too. Front, then right side. Then front again. Then left side, etc.

CHAPTER FOUR

Tongue Circling

As we've mentioned before, people who know nothing about oral sex think it is just about bobbing your head up and down with a penis in your mouth. There are many sucking techniques that have nothing to do with bobbing up and down. Tongue Circling is one of them.

Take the base of your partner's penis into your hand and hold it up in front of your face. Move your face forward, open your mouth and guide his penis gently in until his penis head and the first one to three inches are in. Do not take in any more. For this technique, we only want his head and a few inches in your mouth.

Press your tongue up against the underside of his penis head and those first few inches inside your mouth. Slowly roll your tongue to the right in a circle and then around the side of his penis until the underside of your tongue now touches the topside of his penis head.

Roll your tongue to the left in a circle until his penis flops on top of your tongue again and your tongue is back to caressing the underside of his penis.

Let your tongue circle his penis again and again. You will feel his penis head flopping from side to side inside your

mouth. Be slow and gentle and be sure to not bite his penis with your teeth as he flops inside your mouth.

Repeat the Tongue Circling technique as many times as you want.

For variety and heightened pleasure, alternate your tongue circling technique with some other techniques like Ice Cream Cone Licking and Quick Flick Licking.

For instance, Tongue Circle for a while, then Quick Flick Lick, then Tongue Circle and then Ice Cream Cone Lick.

Be creative!

CHAPTER FIVE

Lip Circling

Lip Circling is another fellatio technique that focuses mostly on the penis head and the first inch or two of the penis.

Take the base of your partner's penis into your hand and hold it up in front of your face. Move your face forward, open your mouth and guide his penis gently in until his penis head and the first one to three inches are in. Do not take in any more. For this technique, we only want his head and a few inches in your mouth.

Purse your lips slightly and form your lips into an "O." With your lips around your partner's penis head, begin to roll your whole head in a circle.

As your head rolls around and around, your lips will press against his penis from the front to the side to the back to the other side to the front again.

Roll your head in circles to the right for a while and then roll to the left for a while changing the sensation he feels on his penis slightly.

Repeat again and again as long as you desire.

For variety and heightened pleasure, alternate your Lip Circling technique with some other techniques like Ice Cream Cone Licking, Tongue Circling and Quick Flick Licking.

Be creative!

CHAPTER SIX

Windshield Wiper

The Windshield Wiper is a fellatio technique that focuses mostly on the penis head and the first two to four inches of the penis.

Take the base of your partner's penis into your hand and hold it up in front of your face. Move your face forward, open your mouth and guide his penis gently in until his penis head and the first two to four inches are in your mouth.

Gently close your lips until his penis is resting on the top of your tongue inside your closed mouth. Be careful not to scratch his penis with your teeth.

Press your tongue tightly against the underside of his penis. Start to move your tongue from side to side keeping it tightly pressed against the underside of his penis. Move your tongue all the way to the right and then back again all the way to the left like a windshield wiper on a car windshield moving from side to side and back again.

For variety and heightened pleasure, alternate your Windshield Wiper technique with other techniques.

Be creative!

CHAPTER SEVEN

Figure Eight

The Figure Eight is a fellatio technique that focuses mostly on the penis head and the first two to four inches of the penis.

Take the base of your partner's penis into your hand and hold it up in front of your face. Move your face forward, open your mouth and guide his penis gently in until his penis head and the first two to four inches are in your mouth.

Gently close your lips until his penis is resting on the top of your tongue inside your closed mouth. Be careful not to scratch his penis with your teeth.

Press your tongue tightly against the underside of his penis. Start to move your tongue as if you were drawing the number eight with your tongue.

Keep your tongue tightly pressed against the underside of his penis.

Draw the figure eight on his penis with your tongue from top to bottom and then from bottom to top. Draw the eight forward and then backward.

Keep your tongue pressed tightly against the underside of the penis to maximize the effect.

For variety and heightened pleasure, alternate your Figure Eight technique with other techniques such as the Windshield Wiper.

Be creative!

CHAPTER EIGHT

Belly Dancer

The Belly Dancer is a fellatio technique that also focuses mostly on the penis head and the first two to four inches of the penis.

Take the base of your partner's penis into your hand and hold it up in front of your face. Move your face forward, open your mouth and guide his penis gently in until his penis head and the first two to four inches are in your mouth.

Gently close your lips until his penis is resting on the top of your tongue inside your closed mouth. Be careful not to scratch his penis with your teeth.

Press your tongue tightly against the underside of his penis. Undulate your tongue as if it was a belly dancer. Start by pressing the back of your tongue against his penis and then pull your tongue backwards while pressing the middle of your tongue and then the tip of your tongue against the underside of his penis.

Repeat the undulating tongue effect again and again

Keep your tongue pressed tightly against the underside of the penis to maximize the effect.

For variety and heightened pleasure, alternate your Belly Dancer technique with other techniques such as the Windshield Wiper and Figure Eight.

Be creative!

CHAPTER NINE

Deep Throat

The Deep Throat is a fellatio technique that focuses on inserting as much of the penis into your mouth as you can comfortably.

Take the base of your partner's penis into your hand and hold it up in front of your face. Move your face forward, open your mouth and guide his penis gently in until his penis head and the first one to three inches are in your mouth.

Gently close your lips until his penis is resting on the top of your tongue inside your closed mouth. Be careful not to scratch his penis with your teeth.

Press your tongue tightly against the underside of his penis. Slowly and sensually move your head forward and insert more of the penis into your mouth - inch by inch until you have reached the limit you can insert comfortably.

Slowly and sensually move your head backward pulling the penis slowly from your mouth inch by inch until just the head and the first inch is still in your mouth. Keep your tongue pressed tightly against the underside of his penis.

Slowly and sensually move your head forward and insert more of the penis into your mouth - inch by inch until you have reached the limit you can insert comfortably, slowly and sensually move your head backward pulling the penis slowly from your mouth inch by inch until just the head and the first inch is still in your mouth while keep your tongue pressed tightly against the underside of his penis.

Repeat again and again.

Keep your tongue pressed tightly against the underside of the penis to maximize the effect.

For variety and heightened pleasure, alternate your Deep Throat technique with other techniques such as the Belly Dancer, Windshield Wiper and Figure Eight.

Be creative!
